

Plan des bandes LF-HF IARU Région 1 - France

F5BU

Version du 12-03-2020, par F5BU, applicable en France métropolitaine et la Réunion

Notes : 1 - Attention : fréquences mini pour mode phonie en LSB : 1843, 3603 and 7053 kHz

2 - Attention : fréquences maxi pour mode phonie en USB : 5363 kHz

Remarques : En SSB, les fréquences du plan de bandes correspondent à celles d'émission, non à celles des porteuses supprimées

Les fréquences spécifiques données correspondent aux fréquences centrales pour ces utilisations
